...focusing on the key emphasis

Focusing on key emphasis entails highlighting key words, using objects using language in a consistent manner, emphasizing key concepts and p what is important to students' attention.

#11 Focus, identify, highlight, be intentional	#12 Change the emphasis	Ch wc me
---	----------------------------	----------

- Built around over 100 narrative examples of teachers connecting their pedagogy to Christian faith, filterable by age and subject area
- Grounded in a coherent approach and offering a comprehensive bank of strategies for generating more examples
- All the necessary tools provided for running a training session with teachers based around this resource
- Clear, accessible explanations of the underlying philosophy
- Everything is related to basic, non-denominational Christian categories

For each example...

- A question and a narrative, showing what happened in class
- Explanation of the strategies being used, with links to strategy pages and consistent framing categories
- Guides for creating more examples and exploration of how this example connects to Christian faith, hope, and love
- Exploration of how the Christian frame changed things and how the idea could be developed further

A coherent approach

- A place to explore theological themes that connect with the example
- The examples are based on and constantly linked back to a coherent underlying approach to thinking about how faith affects pedagogy, rather than just content

Training resources

- This section of the site offers a rich collection of concrete strategies for teachers to explore, each one explained in detail and cross-linked with relevant examples
- Resources for conducting training sessions using the site include a template for a training day, handouts, activities, PowerPoint files, and scripts.
